

TTY-PASS Technical Memorandum #7

10/06

Issue: Positron Developed TTY-PASS Test Tool; P911 4.21 SP5

Explanation: Positron has developed a tool that will help manage P911 relative to the TTY functions. Positron will provide a tool for customers with P911 4.21 SP5 at no extra cost. Please note this means that P911 4.21 SP5 must be installed for the tool to work properly.

Overview: The **Positron TTY-PASS** tool is an application designed to help PSAP managers where Power 911 product is in use to test the TTY functions of their call-taking workstations under the NENA supported TTY Test Program, TTY-PASS. The tool provides a comprehensive TTY test calls report which can then be submitted to the TTY-PASS web site for the registered workstations. Application and Installation instructions will be provided to qualified customers*, upon request.

*Customers must be using P911 4.21 SP5 or above, in order for this tool to function properly.
